ENERGY POLICY

Index to Volume 32

January, February, March, April, May, June, July, August, September, October, November, December

Articles–Titles

Coal

Co-benefits of climate policy—lessons learned from a study in Shanxi, China *K Aunan, J Fang, H Vennemo, K Oye and H M Seip* 32:567–581

Energy for sustainable development in China *N Weidou and T B Johansson* 32:1225–1229

Energy rent and public policy: an analysis of the Canadian coal industry *T Gunton* 32:151–163

Electricity

Baseline recommendations for greenhouse gas mitigation projects in the electric power sector *S Kartha, M Lazarus and M Bosi* 32:545–566

Co-provision in sustainable energy systems: the case of micro-generation *J Watson* 32: 1981–1990

Cross-subsidy in electricity tariffs: evidence from India *P Chattopadhyay* 32:673–684

Deregulated power prices: comparison of diurnal patterns *Y Li and P C Flynn* 32:657–672

Deregulated power prices: comparison of volatility *Y Li and P C Flynn* 32: 1591–1601

Economic impact of regulatory reforms in the electricity supply industry: a panel data analysis for OECD countries *T Hattori and M Tsutsui* 32:823–832

Efficiency and regulation of the Slovenian electricity distribution companies *M Filippini, N Hrovatin and J Zorič* 32:335–344

Elasticities of electricity demand in urban Indian households *M Filippini and S Pachauri* 32:429–436

Electricity access for geographically disadvantaged rural communities—technology and policy insights *A Chaurey, M Ranganathan and P Mohanty* 32:1693–1705

Electricity industry reforms in the Philippines *D Sharma, S E Madamba and M R L Chan* 32:1487–1497

Electricity: taxes on emission liabilities. An examination of the economic effectiveness of Polluter Pays Principles *A M Rahman and C A Edwards* 32:221–235

Electricity theft: a comparative analysis *T B Smith*, 32:2067–2076

Emissions accounting for use and supply of electricity in the Nordic market *J Sjödin and S Grönkvist* 32:1555–1564

Experiments with a methodology to model the role of R&D expenditures in energy technology learning processes; first results *A Miketa and L Schrattenholzer* 32:1679–1692

How much do electricity tariff increases in Ukraine hurt the poor? *B Dodonov, P Opitz and W Pfaffenberger* 32:855–863

Lessons from deregulation in Colombia: successes, failures and the way ahead *E R Larsen, I Dyner, L Bedoya V and C J Franco* 32:1767–1780

Managing electricity procurement cost and risk by a local distribution company *C-K Woo, R I Karimov and I Horowitz* 32:635–645

Measuring international electricity integration: a comparative study of the power systems under the Nordic Council, MERCOSUR, and NAFTA *P-O Pineau, A Hira and K Froschauer* 32:1457–1475

Medium-range planning economics of future electrical-power generation options *J O Jaber, A Al-Sarkhi, B A Akash and M S Mohsen* 32:357–366

Multiproject baselines for evaluation of electric power projects *J Sathaye, S Murtishaw, L Price, M Lefranc, J Roy, H Winkler and R Spalding-Fecher* 32:1303–1317

Opportunity for inter-regional integration of electricity markets: the case of Shandong and Shanghai in East China *E Gnansounou and J Dong* 32:1737–1751

The potential economic and environmental impact of a Public Benefit Fund in Louisiana *M J Kaiser, A G Pulsipher and R H Baumann* 32:191–206

Pricing of Contracts for Difference in the Nordic market *T Kristiansen* 32:1075–1085

A proposal for transmission pricing methodology in Thailand based on electricity tracing and long-run average incremental cost *T Limpasuwan, J W Bialek, W Ongsakul and B Limmeechokchai* 32:301–308

Regulatory performance analysis case study: Britain's electricity industry *R G de Oliveira and M T Tolmasquim* 32:1261–1276

Renewable electricity in the Netherlands *M Junginger, S Agterbosch, A Faaij and W Turkenburg* 32:1053–1073

Reorganization of the power distribution sector in India *R Dossani* 32:1277–1289

The role of the four electric power sectors in the Korean national economy: an input–output analysis *S-Y Han, S-H Yoo and S-J Kwak* 32:1531–1543

US lessons for energy industry restructuring: based on natural gas and California electricity incidences *W-W Lee* 32:237–259

The welfare effects of different pricing schemes for electricity distribution in Finland *M Kopsakangas-Savolainen* 32:1429–1435

What causes the disparity of electricity externality estimates? *T Sundqvist* 32: 1753–1766

Energy and the environment

An analysis of CO_2 emissions of Japanese industries during the period between 1985 and 1995 *N Yabe* 32:595–610

An analysis of the Greek energy system in view of the Kyoto commitments *D Agoris, K Tigas, G Giannakidis, F Siakkis, S Vassos, N Vassilakos, V Kilias and M Damassiotis* 32:2019–2033

Baseline recommendations for greenhouse gas mitigation projects in the electric power sector *S Kartha, M Lazarus and M Bosi* 32:545–566

Carbon exergy tax: a thermo-economic method to increase the efficient use of exergy resources *M G L Santarelli* 32:413–427

Climate coalitions and international trade: assessment of cooperation incentives by issue linkage *C Kemfert* 32:455–465

CO2 emission from energy use in India: a decomposition analysis *S Paul and R N Bhattachary* 32:585–593

CO2 mitigation and power generation implications of clean supply-side and demand-side technologies in Thailand *S Tanatvanit, B Limmeechokchai and R M Shrestha* 32:83–90

Co-benefits of climate policy—lessons learned from a study in Shanxi, China *K Aunan, J Fang, H Vennemo, K Oye and H M Seip* 32:567–581

Comments on the Brazilian Proposal and contributions to global temperature increase with different climate responses—CO_2 emissions due to fossil fuels, CO_2 emissions due to land use change *L P Rosa, S K Ribeiro, M S Muylaert and C Pires de Campos* 32:1499–1510

Economics of clean development mechanism power projects under alternative approaches for setting baseline emissions *R M Shrestha and R Shrestha* 32:1363–1374

The effect of wind power on CO_2 abatement in the Nordic Countries *H Holttinen and S Tuhkanen* 32:1639–1652

Electricity: taxes on emission liabilities. An examination of the economic effectiveness of Polluter Pays Principles *A M Rahman and C A Edwards* 32:221–235

Emissions accounting for use and supply of electricity in the Nordic market *J Sjödin and S Grönkvist* 32:1555–1564

Emissions trading and competitiveness: pros and cons of relative and absolute schemes *O Kuik and M Mulder* 32:737–745

Energy and emission monitoring for policy use Trend analysis with reconstructed energy balances *P G M Boonekamp* 32: 969–988

Energy security and global climate change mitigation *H G Huntington and S P A Brown*, 32:715–718
Energy sustainability and global warming in Spain *F Hernández, M A Gual, P Del Río and A Caparrós* 32:383–394
Environmental policy-making in a difficult context: motorized two-wheeled vehicle emissions in India *M G Badami* 32: 1861–1877
Estimates of the costs of Kyoto: Marrakesh versus the McKibbin–Wilcoxen blueprint *W J McKibbin and P J Wilcoxen* 32:467–479
Estimating the price of tradable permits for greenhouse gas emissions in 2008–12 *U Springer and M Varilek* 32:611–621
European Union balancing between CO_2 reduction commitments and growth policies: decomposition analyses The *J Kaivo-oja and J Luukkanen* 32:1511–1530
Firewood consumption pattern of different tribal communities in Northeast India *B P Bhatt and M S Sachan* 32:1–6
Fossil electricity and CO_2 sequestration: how natural gas prices, initial conditions and retrofits determine the cost of controlling CO_2 emissions *T L Johnson and D W Keith* 32:367–382
Greenhouse gas emissions in Norway: do carbon taxes work? *A Bruvoll and B M Larsen* 32:493–505
Greening London's black cabs: a study of driver's preferences for fuel cell taxis *S Mourato, B Saynor and D Hart* 32:685–695
How should greenhouse gas permits be allocated in the EU? *M Vesterdal and G T Svendsen* 32:961–968
The impact of IT investment on energy: Japan and US comparison in 2010 *K Takase and Y Murota* 32:1291–1301
Implications of changes in household stoves and fuel use in China *R D Edwards, K R Smith, J Zhang and Y Ma* 32:395–411
Joint implementation: methodology and policy considerations *K Illum and N I Meyer* 32:1013–1023
The learning potential of photovoltaics: implications for energy policy *B der Zwaan and A Rabl* 32:1545–1554
Local and regional greenhouse gas management *P D Fleming and P H Webber*, 32: 761–771
Mitigation policies for energy related greenhouse gas emissions in Cyprus: the potential role of natural gas imports *S Mirasgedis, Y Sarafidis, E Georgopoulou, D P Lalas and C Papastavro*, 32:1001–1011
Must developing countries commit quantified targets? Time flexibility and equity in climate change mitigation *T Sugiyama and L Deshun* 32:697–704
The near-term impacts of carbon mitigation policies on manufacturing industries *R D Morgenstern, M Ho, J-S Shih and X Zhang* 32:1825–1841
The power sector in China and India: greenhouse gas emissions reduction potential and scenarios for 1990–2020 *C Kroeze, J Vlasblom, J Gupta, C Boudri and K Blok* 32:55–76
Process industry energy retrofits: the importance of emission baselines for greenhouse gas reductions *A Ådahl, S Harvey and T Berntsson* 32:1375–1388
On the quality of compliance mechanisms in the Kyoto Protocol *A Nentjes and G Klaassen* 32:531–544
Quantifying the severity of fuel poverty, its relationship with poor housing and reasons for non-investment in energy-saving measures in Ireland *J D Healy and J P Clinch* 32:207–220
Renewable energy and market-based approaches to greenhouse gas reduction—opportunity or obstacle? *C L Sonneborn* 32:1799–1805
The safety valve and climate policy *H D Jacoby and A D Ellerman* 32:481–491
Societal lifecycle costs of cars with alternative fuels/engines *J M Ogden, R H Williams and E D Larson* 32:7–27
State responsibility and compensation for climate change damages—a legal and economic assessment *R S J Tol and R Verheyend* 32:1109–1130
A theoretical prediction of non-methane gaseous emissions from natural gas combustion *J A Sonibare and F A Akeredolu* 32: 1653–1665
Thermo-power in Brazil: diagnosis of control and monitoring of gas emissions *E E Xavier, A Magrini, L P Rosa and M A dos Santos* 32:915–927
Uncertain discount rates in climate policy analysis *R G Newell and W A Pize*, 32: 519–529
US rejection of the Kyoto Protocol: the impact on compliance costs and CO_2 emissions *A Manne and R Richels* 32:447–454
The welfare effects of different pricing schemes for electricity distribution in Finland *M Kopsakangas-Savolainen* 32:1429–1435
What do we know about carbon taxes? An inquiry into their impacts on competitiveness and distribution of income *Z-X Zhang and A Baranzini* 32:507–518
Will OPEC lose from the Kyoto Protocol? *J Barnett, S Dessai and M Webber* 32: 2077–2088

Energy conservation and efficiency

An analysis of cross-sectional variations in total household energy requirements in India using micro survey data *S Pachauri* 32: 1723–1735
Assessment of energy efficiency options in the building sector of Lebanon *R B Chedid and R F Ghajar* 32:647–655
Cost–benefit analysis of implementing minimum energy efficiency standards for household refrigerator-freezers in Malaysia *T M I Mahlia, H H Masjuki, R Saidur and M A Amalina* 32:1819–1824
Decision support for energy conservation promotion: an analytic hierarchy process approach *M M Kablan* 32:1151–1158
Diffusion of energy-saving innovations in industry and the built environment: Dutch studies as inputs for a more integrated analytical framework *C Dieperink, I Brand and W Vermeulen* 32:773–784
Do customer information programs reduce household electricity demand?—the Irish program *U Dulleck and S Kaufmann* 32:1025–1032
Energy and exergy use in public and private sector of Saudi Arabia *I Dincer, M M Hussain and I Al-Zaharnah* 32:1615–1624
Energy education: breaking up the rational energy use barriers *R A Dias, C R Mattos and J A P Balestieria* 32:1339–1347
The guidelines for state policy of energy efficiency in Lithuania *V Klevas and R Minkstimas* 32:309–320
The impact of IT investment on energy: Japan and US comparison in 2010 *K Takase and Y Murota* 32:1291–1301
Implications of changes in household stoves and fuel use in China *R D Edwards, K R Smith, J Zhang and Y Ma* 32:395–411
Modelling a district heating system: introduction of waste incineration, policy instruments and co-operation with an industry *K Holmgren and A Gebremedhin* 32:1807–1817
New directions for household energy efficiency: evidence from the UK *B Boardman* 32: 1921–1933
Policies for advancing energy efficiency and renewable energy use in Brazil *H Geller, R Schaeffer, A Szklo and M Tolmasquim* 32:1437–1450
Residential energy use: an international perspective on long-term trends in Denmark, Norway and Sweden *F Unander, I Ettestøl, M Ting and L Schipper* 32:1395–1404
Step changes for decarbonising the energy system: research needs for renewables energy efficiency and nuclear power *P Ekins* 32:1891–1904
Stimulating R&D of industrial energy-efficient technology. Policy lessons—impulse technology *E Luiten and K Blok* 32:1087–1108
WAP explained *M J Kaiser and A G Pulsipher* 32:1843–1860

Energy modelling

Conversion factors and oil statistics *S Karbuz* 32:41–45
A decision model for financial assurance instruments in the upstream petroleum sector *D Ferreira, S Suslick, J Farley, R Costanza and S Krivov* 32:1173–1184
Decision support for energy conservation promotion: an analytic hierarchy process approach *M M Kablan* 32:1151–1158
Decomposition analysis for policymaking in energy: which is the preferred method? *B W Ang* 32:1131–1139
Design of coordinated energy and environmental policies: use of multi-criteria decision-making *L A Greening and S Bernow* 32:721–735
Effects of NYMEX trading on IPE Brent Crude futures markets: a duration analysis *S X Lin and M N Tamvakis* 32:77–82
Empirical assessment of energy-price policies: the case for cross-price elasticities *M Frondel* 32:989–1000
Estimates of the costs of Kyoto: Marrakesh versus the McKibbin–Wilcoxen blueprint *W J McKibbin and P J Wilcoxen* 32:467–479
Experiments with a methodology to model the role of R&D expenditures in energy technology learning processes; first results *A Miketa and L Schrattenholzer* 32:1679–1692
Long-term infrastructure forecasting in the Gulf of Mexico: a decision- and resource-based approach *M J Kaiser, D V Mesyanzhinov and A G Pulsipher* 32:1209–1224
Multiproject baselines for evaluation of electric power projects *J Sathaye, S Murtishaw, L*

Price, M Lefranc, J Roy, H Winkler and R Spalding-Fecher 32:1303–1317
Opportunity for inter-regional integration of electricity markets: the case of Shandong and Shanghai in East China *E Gnansounou and J Dong* 32:1737–1751
The potential economic and environmental impact of a Public Benefit Fund in Louisiana *M J Kaiser, A G Pulsipher and R H Baumann* 32:191–206
On the predictive accuracy of crude oil futures prices *S Abosedra and H Baghestani* 32:1389–1393

Energy policy and analysis
Carbon exergy tax: a thermo-economic method to increase the efficient use of exergy resources *M G L Santarelli* 32:413–427
CO_2 mitigation and power generation implications of clean supply-side and demand-side technologies in Thailand *S Tanatvanit, B Limmeechokchai and R M Shrestha* 32:83–90
Decomposition analysis for policymaking in energy: which is the preferred method? *B W Ang* 32:1131–1139
Design of coordinated energy and environmental policies: use of multi-criteria decision-making *L A Greening and S Bernow* 32:721–735
Dynamic energy analysis to assess maximum growth rates in developing power generation capacity: case study of India *J Mathur, N K Bansal and H-J Wagner* 32:281–287
Economic potential of natural gas-fired cogeneration—analysis of Brazil's chemical industry *A S Szklo, J B Soares and M T Tolmasquim* 32:1415–1428
Electricity access for geographically disadvantaged rural communities—technology and policy insights *A Chaurey, M Ranganathan and P Mohanty* 32:1693–1705
Electricity consump ion and economic growth in China *A Shiu and P-L Lam* 32:47–54
Electricity: taxes on emission liabilities. An examination of the economic effectiveness of Polluter Pays Principles *A M Rahman and C A Edwards* 32:221–235
Empirical assessment of energy-price policies: the case for cross-price elasticities *M Frondel* 32:989–1000
Energy and emission monitoring for policy use. Trend analysis with reconstructed energy balances *P G M Boonekamp* 32:969–988
Energy policy options—from the perspective of public attitudes and risk perceptions *M Viklund* 32:1159–1171
Energy rent and public policy: an analysis of the Canadian coal industry *T Gunton* 32:151–163
Energy sustainability and global warming in Spain *F Hernández, M A Gual, P Del Río and A Caparrós* 32:383–394
Implementation of manure digestion and co-combustion in the Dutch electricity regime: a multi-level analysis of market implementation in the Netherlands *R P J M Raven* 32:29–39
Integration of national and regional energy development programs in Baltic States *V Klevas and M Antinucci* 32:345–355
Lessons from deregulation in Colombia: successes, failures and the way ahead *E R Larsen, I Dyner, L Bedoya V and C J Franco* 32:1767–1780
The near-term impacts of carbon mitigation policies on manufacturing industries *R D Morgenstern, M Ho, J-S Shih and X Zhang* 32:1825–1841
The potential economic and environmental impact of a Public Benefit Fund in Louisiana *M J Kaiser, A G Pulsipher and R H Baumann* 32:191–206
The potential of solar electric power for meeting future US energy needs: a comparison of projections of solar electric energy generation and Arctic National Wildlife Refuge oil production *J Byrne, L Kurdgelashvili, D Poponi and A Barnett* 32:289–297
The safety valve and climate policy *H D Jacoby and A D Ellerman* 32:481–491
Slow, slow, quick, quick slow: Saudi Arabia's 'Gas Initiative' *P Robins* 32:321–333
Technical and economical analysis of an induced demand in the photovoltaic sector *U Ciorba, F Pauli and P Menna* 32:949–960
Uncertain discount rates in climate policy analysis *R G Newell and W A Pizer* 32:519–529
US lessons for energy industry restructuring: based on natural gas and California electricity incidences *W-W Lee* 32:237–259

Energy security and world trade
Climate coalitions and international trade: assessment of cooperation incentives by issue linkage *C Kemfert* 32:455–465
The costs and benefits of early action before Kyoto compliance *H Pana and D Van Regemorter* 32:1477–1486
Effects of NYMEX trading on IPE Brent Crude futures markets: a duration analysis *S X Lin and M N Tamvakis* 32:77–82
Emissions trading and competitiveness: pros and cons of relative and absolute schemes *O Kuik and M Mulder* 32:737–745
Energy security and global climate change mitigation *H G Huntington and S P A Brown* 32:715–718
Estimating the price of tradable permits for greenhouse gas emissions in 2008–12 *U Springer and M Varilek* 32:611–621
Measuring international electricity integration: a comparative study of the power systems under the Nordic Council, MERCOSUR, and NAFTA *P-O Pineau, A Hira and K Froschauer* 32:1457–1475
Pricing of Contracts for Difference in the Nordic market *T Kristiansen* 32:1075–1085
On the quality of compliance mechanisms in the Kyoto Protocol *A Nentjes and G Klaassen* 32:531–544
The safety valve and climate policy *H D Jacoby and A D Ellerman* 32:481–491
UK gas security: time to get serious *J Stern* 32:1967–1979
What do we know about carbon taxes? An inquiry into their impacts on competitiveness and distribution of income *Z-X Zhang and A Baranzini* 32:507–518

Energy supply and demand
Do customer information programs reduce household electricity demand?—the Irish program *U Dulleck and S Kaufmann* 32:1025–1032
Elasticities of electricity demand in urban Indian households *M Filippini and S Pachauri* 32:429–436
Electricity consumption and economic growth in China *A Shiu and P-L Lam* 32:47–54
Medium-range planning economics of future electrical-power generation options *J O Jaber, A Al-Sarkhi, B A Akash and M S Mohsen* 32:357–366
OPEC's optimal crude oil price *M Horn* 32:269–280
A proposal for transmission pricing methodology in Thailand based on electricity tracing and long-run average incremental cost *T Limpasuwan, J W Bialek, W Ongsakul and B Limmeechokchai* 32:301–308
US lessons for energy industry restructuring: based on natural gas and California electricity incidences *W-W Lee* 32:237–259

Energy Technology
Co-provision in sustainable energy systems: the case of micro-generation *J Watson* 32: 1981–1990
Distributed generation: remote power systems with advanced storage technologies *W Clark and W Isherwood* 32:1573–1589
Fuel cell system economics: comparing the costs of generating power with stationary and motor vehicle PEM fuel cell systems *T E Lipman, J L Edwards and D M Kammen* 32:101–125
Greening London's black cabs: a study of driver's preferences for fuel cell taxis *S Mourato, B Saynor and D Hart* 32:685–695
Hydrogen from renewable resources—the hundred year commitment *K-A Adamson* 32:1231–1241
The impact of IT investment on energy: Japan and US comparison in 2010 *K Takase and Y Murota* 32:1291–1301
Replacing diesel by solar in the Amazon: short-term economic feasibility of PV-diesel hybrid systems *A L Schmid and C A A Hoffmann* 32:881–898
Societal lifecycle costs of cars with alternative fuels/engines *J M Ogden, R H Williams and E D Larson* 32:7–27
Stimulating R&D of industrial energy-efficient technology. Policy lessons—impulse technology *E Luiten and K Blok* 32:1087–1108
Technologies and innovation for system change in the UK: status prospects and system requirements of some leading renewable energy options *R Gross* 32:1905–1919
Thermopower generation investment in Brazil—economic conditions *A Moreira, K Rocha and P David* 32:91–100

LDCs
Distributed generation: remote power systems with advanced storage technologies *W Clark and W Isherwood* 32:1573–1589
Efficiency and regulation of the Slovenian electricity distribution companies *M Filippini, N Hrovatin and J Zorić* 32:335–344
Harvesting and redistributing renewable energy: on the role of gas and electricity grids to overcome intermittency through the generation and storage of hydrogen *D Anderson and M Leach* 32:1603–1614
Managing electricity procurement cost and risk by a local distribution company *C-K Woo, R I Karimov and I Horowitz* 32:635–645
Policy alternatives in reforming energy utilities in developing countries *A Gabriele* 32: 1319–1337

Reorganization of the power distribution sector in India *R Dossani* 32:1277–1289
The welfare effects of different pricing schemes for electricity distribution in Finland *M Kopsakangas-Savolainen* 32:1429–1435

National and regional energy policies and government policy

An analysis of the Greek energy system in view of the Kyoto commitments *D Agoris, K Tigas, G Giannakidis, F Siakkis, S Vassos, N Vassilakos, V Kilias and M Damassiotis* 32:2019–2033
Assessment of energy efficiency options in the building sector of Lebanon *R B Chedid and R F Ghajar* 32:647–655
CO_2 mitigation and power generation implications of clean supply-side and demand-side technologies in Thailand *S Tanatvanit, B Limmeechokchai and R M Shrestha* 32:83–90
Comparison of energy intensities in European Union countries. Results of a structural decomposition analysis *V Alcántara and R Duarte* 32:177–189
Dynamic energy analysis to assess maximum growth rates in developing power generation capacity: case study of India *J Mathur, N K Bansal and H-J Wagner* 32:281–287
On the economics of electricity consumption in small island/developing states: a role for renewable energy technologies? *D Weisser* 32:127–140
Electricity consumption and economic growth in China *A Shiu and P-L Lam* 32:47–54
Energy for sustainable development in China *N Weidou and T B Johansson* 32:1225–1229
Energy rent and public policy: an analysis of the Canadian coal industry *T Gunton* 32:151–163
Greenhouse gas emissions in Norway: do carbon taxes work? *A Bruvoll and B M Larsen* 32:493–505
The guidelines for state policy of energy efficiency in Lithuania *V Klevas and R Minkstimas* 32:309–320
How adequate policies can push renewables *J Goldemberg, S T Coelho and O Lucon* 32:1141–1146
How should greenhouse gas permits be allocated in the EU? *M Vesterdal and G T Svendsen* 32:961–968
Implementation of manure digestion and co-combustion in the Dutch electricity regime: a multi-level analysis of market implementation in the Netherlands *R P J M Raven* 32:29–39
Implications of changes in household stoves and fuel use in China *R D Edwards, K R Smith, J Zhang and Y Ma* 32:395–411
Integration of national and regional energy development programs in Baltic States *V Klevas and M Antinucci* 32:345–355
Joint implementation in energy between the EU and Russia. Outlook and potential *F Laroui, E Tellegen and K Tourilova* 32:899–914
Joint implementation: methodology and policy considerations *K Illum and N I Meyer* 32:1013–1023
Nuclear power and the characteristics of 'ordinariness'—the case of UK energy policy *G MacKerron* 32:1957–1965
Oil policies and privatization strategies in Mexico: implications for the petrochemical sector and its production spaces *N M Laguna* 32:2035–2047
Policies for advancing energy efficiency and renewable energy use in Brazil *H Geller, R Schaeffer, A Szklo and M Tolmasquim* 32:1437–1450
Policy alternatives in reforming energy utilities in developing countries *A Gabriele* 32:1319–1337
Quantifying the severity of fuel poverty, its relationship with poor housing and reasons for non-investment in energy-saving measures in Ireland *J D Healy and J P Clinch* 32:207–220
REFIT and RPS: options for a harmonised Community framework *V Lauber* 32:1405–1414
Regulatory performance analysis case study: Britain's electricity industry *R G de Oliveira and M T Tolmasquim* 32:1261–1276
Renewable electricity in the Netherlands *M Junginger, S Agterbosch, A Faaij and W Turkenburg* 32:1053–1073
Renewable energy policy in the UK 1990–2003 *C Mitchell and P Connor* 32:1935–1947
Slow, slow, quick, quick slow: Saudi Arabia's 'Gas Initiative' *P Robins* 32:321–333
State responsibility and compensation for climate change damages—a legal and economic assessment *R S J Tol and R Verheyend* 32:1109–1130
Tradable green certificates in Flanders (Belgium) *A Verbruggen* 32:165–176

Nuclear power

Nuclear power and the characteristics of 'ordinariness'—the case of UK energy policy *G MacKerron* 32:1957–1965
Step changes for decarbonising the energy system: research needs for renewables energy efficiency and nuclear power *P Ekins* 32:1891–1904

Oil and gas

Conversion factors and oil statistics *S Karbuz* 32:41–45
Daily oil losses in shipping crude oil: measuring crude oil loss rates in daily North Sea shipping operations *R Bhatia and J Dinwoodie* 32:811–822
A decision model for financial assurance instruments in the upstream petroleum sector *D Ferreira, S Suslick, J Farley, R Costanza and S Krivov* 32:1173–1184
Economic potential of natural gas-fired cogeneration—analysis of Brazil's chemical industry *A S Szklo, J B Soares and M T Tolmasquim* 32:1415–1428
Mitigation policies for energy related greenhouse gas emissions in Cyprus: the potential role of natural gas imports *S Mirasgedis, Y Sarafidis, E Georgopoulou, D P Lalas and C Papastavros* 32:1001–1011
Oil policies and privatization strategies in Mexico: implications for the petrochemical sector and its production spaces *N M Laguna* 32:2035–2047
OPEC's optimal crude oil price *M Horn* 32:269–280
The potential of solar electric power for meeting future US energy needs: a comparison of projections of solar electric energy generation and Arctic National Wildlife Refuge oil production *J Byrne, L Kurdgelashvili, D Poponi and A Barnett* 32:289–297
On the predictive accuracy of crude oil futures prices *S Abosedra and H Baghestani* 32:1389–1393
Slow, slow, quick, quick slow: Saudi Arabia's 'Gas Initiative' *P Robins* 32:321–333
Societal lifecycle costs of cars with alternative fuels/engines *J M Ogden, R H Williams and E D Larson* 32:7–27
A theoretical prediction of non-methane gaseous emissions from natural gas combustion *J A Sonibare and F A Akeredolu* 32:1653–1665
UK gas security: time to get serious *J Stern* 32:1967–1979
US lessons for energy industry restructuring: based on natural gas and California electricity incidences *W-W Lee* 32:237–259
Will OPEC lose from the Kyoto Protocol? *J Barnett, S Dessai and M Webber* 32:2077–2088

Renewables

Action plan for wind energy development in the Canary Islands *R Calero and J A Carta* 32:1185–1197
Bioenergy policy and market development in Finland and Sweden *K Ericsson, S Huttunen, L J Nilsson and P Svenningsson* 32:1707–1721
Biomass energy technologies for rural infrastructure and village power—opportunities and challenges in the context of global climate change concerns *V V N Kishore, P M Bhandari and P Gupta* 32:801–810
Can photovoltaic technologies help attain sustainable rural development in Bangladesh? *W K Biswas, M Diesendorf and P Bryce*,32:1199–1207
Conflict over biomass energy development in the United Kingdom: some observations and lessons from England and Wales *B R Upreti* 32:785–800
On the economics of electricity consumption in small island/developing states: a role for renewable energy technologies? *D Weisser* 32:127–140
The effect of wind power on CO_2 abatement in the Nordic Countries *H Holttinen and S Tuhkanen* 32:1639–1652
Efficiency versus cost of alternative fuels from renewable resources: outlining decision parameters *S Kaul and R Edinger* 32:929–935
Firewood consumption pattern of different tribal communities in Northeast India *B P Bhatt and M S Sachan* 32:1–6
Geothermal energy sources for water production—socio-economic effects and people's wishes on Milos island: a case study *E Manologlou, P Tsartas and A Markou* 32:623–633
Harvesting and redistributing renewable energy: on the role of gas and electricity grids to overcome intermittency through the generation and storage of hydrogen *D Anderson and M Leach* 32:1603–1614
How adequate policies can push renewables *J Goldemberg, S T Coelho and O Lucon* 32:1141–1146
Hydrogen from renewable resources—the hundred year commitment *K-A Adamson* 32:1231–1241

Implementation of manure digestion and co-combustion in the Dutch electricity regime: a multi-level analysis of market implementation in the Netherlands *R P J M Raven* 32:29–39

Implementation of wind energy in the Netherlands: the importance of the social–institutional setting *S Agterbosch, W Vermeulen and P Glasbergen* 32:2049–2066

Investigation of Greek wind energy market time-evolution *J K Kaldellis* 32:865–879

The learning potential of photovoltaics: implications for energy policy *B der Zwaan and A Rabl* 32:1545–1554

Notions on learning applied to wind turbine development in the Netherlands and Denmark *L M Kamp, R E H M Smits and C D Andriesse* 32:1625–1637

Policies for advancing energy efficiency and renewable energy use in Brazil *H Geller, R Schaeffer, A Szklo and M Tolmasquim* 32:1437–1450

The potential of solar electric power for meeting future US energy needs: a comparison of projections of solar electric energy generation and Arctic National Wildlife Refuge oil production *J Byrne, L Kurdgelashvili, D Poponi and A Barnett* 32:289–297

Principles of green accounting for renewable and nonrenewable energy resources *R D Cairns* 32:261–267

REFIT and RPS: options for a harmonised Community framework *V Lauber* 32:1405–1414

Renewable electricity in the Netherlands *M Junginger, S Agterbosch, A Faaij and W Turkenburg* 32:1053–1073

Renewable energy policy in the UK 1990–2003 *C Mitchell and P Connor* 32:1935–1947

Replacing diesel by solar in the Amazon: short-term economic feasibility of PV-diesel hybrid systems *A L Schmid and C A A Hoffmann* 32:881–898

Solar systems diffusion in local markets *D K Sidiras and E G Koukios* 32:2007–2018

Step changes for decarbonising the energy system: research needs for renewables energy efficiency and nuclear power *P Ekins* 32:1891–1904

Technical and economical analysis of an induced demand in the photovoltaic sector *U Ciorba, F Pauli and P Menna* 32:949–960

Technologies and innovation for system change in the UK: status prospects and system requirements of some leading renewable energy options *R Gross* 32:1905–1919

Thailand's solar white elephants: an analysis of 15 yr of solar battery charging programmes in northern Thailand *D Green* 32:747–760

Total cost estimates for large-scale wind scenarios in UK *L Dale, D Milborrow, R Slark and G Strbac* 32:1949–1956

Tradable green certificates in Flanders (Belgium) *A Verbruggen* 32:165–176

The role of utilities

Efficiency and regulation of the Slovenian electricity distribution companies *M Filippini, N Hrovatin and J Zorić* 32:335–344

Electricity theft: a comparative analysis *T B Smith* 32:2067–2076

How much do electricity tariff increases in Ukraine hurt the poor? *B Dodonov, P Opitz and W Pfaffenberger* 32:855–863

Policy alternatives in reforming energy utilities in developing countries *A Gabriele* 32:1319–1337

The role of the four electric power sectors in the Korean national economy: an input–output analysis *S-Y Han, S-H Yoo and S-J Kwak* 32:1531–1543
